Introducing Project Vision

Your Partner in Business-Enabling Technologies

Since 2009, we have been at the forefront of IT services, earning multiple awards for our innovative and forward-thinking approach by providing high-level services to SMEs and global organisations throughout London & nationwide.

Our expertise spans a range of services, including Structured IT Cabling, Network and Wireless solutions, Audio-Visual solutions, and IT Security. But what sets us apart is our commitment to personal service and customer care.

At Project Vision, we understand that every business has unique needs. That's why our fully qualified and accredited engineers take ownership of your project from start to finish—delivering on time and within budget.

We eliminate the headaches of designing, planning, implementing and maintaining your IT systems, freeing you to focus on growing your business. So as you evolve, your IT requirements can scale along with you.

At Project Vision, we bring you the technology you need today – with tomorrow in mind.

Your project, realised!

Our Accreditations:

ISO 9001 – Quality Management

Systems Standard: Evidencing our consistent delivery of high quality services that meet both customer and regulatory requirements.

ISO 14001 – Environmental

Management Standard: Recognising that we follow an approved framework for efficient resource management.

**Over 30 years
of experience
in the industry**

Multi-Award Winning:

- Audio Visual & Fibre IT Cabling Company of the Year 2022
- Excellence Award for Video Conferencing Solutions 2021
- Most Trusted Nationwide IT Cabling Services Provider 2021

Audio Visual

Cutting-edge Audio-Visual solutions to support agile and remote working, business expansion, upgrades or relocations. With offices integrating a more relaxed approach to the working environment, bringing audio-visual requirements into the likes of break-out areas, town hall spaces and receptions with solutions such as digital signage and video walls becoming ever increasingly popular. Our AV Solutions are ideal for:

- Global presentations
- Inter-departmental working
- Convenient information sharing

**Over 31
cities worked**

Meeting Room AV

Our specialist audio-visual engineers have the skills and expertise to help you to make informed technology decisions. They will work with you to plan, design and implement high-performance video-conferencing solutions that best meet your requirements.

Integrated Audio-Visual System

Our accredited AV engineers can converge disparate business technologies into a single integrated platform, delivering cost-effective communication solutions and simplifying company processes.

Video-Conferencing System

Installing a video-conferencing system into your organisation can benefit your company in many ways, from creating efficient communication channels with your staff to accelerating commercial decision-making processes.

Fibre & IT Cabling

Efficient, high-performance, high quality and fully operational IT cabling solutions without hidden costs. Our industry experience allows us to create bespoke IT cabling systems that meet your current and future needs. We consider the operational environment, and our highly-qualified engineers provide expert advice, design, and implementation to deliver maximum benefit.

**1 million+ km
cables installed**

Fibre & IT Cabling Solutions

At Project Vision, we design, install, test and commission a full range of high-quality IT cabling systems. This includes all levels of standards-compliant copper, fibre optic and specialist cabling systems, including Audio Visual.

Accredited IT Cabling Engineers

We are accredited installation and support partners for IT cabling system manufacturers, including Corning, CommScope and Molex.

Virgin Media Partnership

We are a key infrastructure partner of Virgin Media and undertake installations on their behalf within London, with our main area of expertise being FTTX. We implement all aspects of the Virgin Media network within some of London's largest new build developments, for example the Wood Wharf developments in canary Wharf, which comprised of over 3000 apartments and retail spaces. To date we have installed and commissioned full fibre to the property on behalf of Virgin Media in over 15,000 units within London.

Wireless & Networks

Network and wireless solutions to support your business collaborations. Our Network Solutions include:

- Hardware
- Cabling
- Software Setup
- After Sales Support

**Over 178
clients supported**

Network Services

With extensive knowledge of the latest network and cloud-based technologies, we can advise on efficient and effective solutions for networks, wireless, and security. We install compliant, enterprise-class secure networks that support IP-based services like VOIP phone systems, wireless services, desktop sharing tools and AV.

Network & Wireless Support

Fast, managed, secure network and wireless connections are essential for communication. As network and convergence specialists, we offer expert design and implementation services for network, VOIP, wireless, and cyber security systems to ensure your organisation stays connected securely.

IT Security

Are you prepared for the next cyber attack? We will secure your systems, educate your team and mitigate risk. Every organisation is unique, so we tailor robust IT security systems for your organisation and budget. Our accredited technical teams will work closely with you to understand your current system setup. From there, we will recommend suitable systems, security measures and policies to boost your resilience to cyber-attack.

**Over 92%
client retention**

Cyber Security

IT system compromises can be devastating and costly to reinstate. To protect your data, operations, customers, and reputation, having the latest security prevention tools on your network is crucial.

Dedicated IT Security Teams

Our accredited engineers are on hand to ensure you have robust prevention systems to deter attackers. We will install sophisticated intrusion detection systems to spot attacks and raise alarms accordingly; a swift response will minimise the impact of any security breach. As many security breaches result from human error, we can advise on IT security policies. The focus is on building awareness and implementing good practices to reduce risk. Additionally, with well-tested backup solutions, Project Vision will prepare the necessary responses to fix a breach or recover data should a cyber-attack occur.

IT Support

Delivering reliable and responsive 5-star technical support from accredited engineers. We can assist you with:

- Fully Managed Hardware Break/Fix/Replace Support
- Fully Managed Helpdesk and Technical Support Services
- Pre-booked or issue specific on-site Engineering Services
- All services managed and delivered under Service Level Agreement Contracts

Do you need 24/7 cover?

We offer tailored hardware support packages to meet your particular business requirements.

Hardware Support

IT system compromises can be devastating and costly to reinstate. Having the latest security prevention tools on your network is crucial to protect your data, operations, customers, and reputation.

Managed IT Services

Our annual fixed-price network support service is designed for growing businesses that need regular IT support to keep networks running smoothly and securely, whether you need an onsite engineer one day a week or require 24/7 remote monitoring. Project Vision will provide you with precisely what you need without unnecessary extras.
